Precision Hearing Brings Audiology Innovation to Carlsbad

Carlsbad, Calif. – With the launch of their new Carlsbad office, Vickie Moskowitz, Au.D, CCC, and Andrew Dickman, M.A., FAAA, have raised the bar for hearing health care, introducing a comprehensive range of innovative audiology services unmatched in the industry.

Their state-of-the-art equipment includes Visual Hearing, allowing patients to see their hearing loss displayed on a screen and see how hearing aids will improve their hearing. It even lets a friend or loved one experience firsthand what it is like to hear with hearing loss.

“Education and counseling provided to both patient and family members are essential to effective management of hearing impairment,” says Andy Dickman. The practice’s exclusive Sound Advice educational seminars address topics including current hearing aid technologies, assistive listening devices and suggestions for improved communication.

Another unique feature are Precision Hearing’s comfortable Hearing Lounges, where patients test assistive listening devices, including TV hearing ears, telephone amplifiers and more.

While often associated with age or overexposure to noise, hearing loss can afflict anyone, adversely impacting every aspect of life. “An individual experiencing hearing loss often suffers a sense of isolation, embarrassment and anger. The person may even be in physical danger if the loss is profound. Every case is different, and we tailor solutions to meet the patient’s needs and preferences,” says Vickie Moskowitz.

Precision Hearing tests infants from six months to five years at its Vista office and older children at the Carlsbad and Rancho Bernardo offices.

Precision Hearing is located at 3144 El Camino Real, Suite 105. With offices in Vista and Rancho Bernardo. For more information, call (760) 729-7800.
